

Student Information System (SIS)

Process-based system to best execute university processes including: applications, admissions, pre-registration, registration & add/drop process, grading & graduation.

Use as a stand-alone web-based SIS or integrate with UniversiTools scheduling and management solutions to maximize your university processes:

- Course Information
- Instructor information
- Applicant information
- Student information
- Applications
- Admission
- Enrollment
- Student Contract Sheet
- Course Planning
- Advising (Early Registration)
- Advising (Pre-Registration)
- Registration
- Grading
- Transcripts
- Clearance
- Graduation
- Tuition Fees
- User accounts and right of entry

UniversiTools SIS handles among others the following tasks:

- Receiving and validating new student applications
- Accepting new applicants
- Enrolling students in college programs
- Transforming applicant status to student and managing related information
- Defining courses and catalogs
- Offering and scheduling courses
- Managing instructor information, and credit or hourly work load
- Taking into account instructor's preferred teaching days and periods
- Reporting exam grades, student averages, statistics, and transcripts
- Accounting/Clearing financials
- Clearing pre-requisites for course registration
- Organizing different study programs, majors and tracks
- Issuing graduation lists
- Managing student status
